

Pacific 'Rolls' ahead

Introducing the all new Pacific Producer.

Pacific Truck & Trailer rolls on as the industry leader in custom built on/off highway logging trucks. Pacific now introduces the producer of the future with increased driver comfort built into every truck.

The heavy duty all steel constructed Pacific cab is now available with a newly designed fibreglass tilt hood, as well as the steel butterfly hood and both models offer increased

visibility. Inside the cab, the new "wrap around" style dash offers much greater accessibility to controls and switches. The steering column has been moved forward and offers a choice of three positions for added driver comfort.

To assist the driver in tight switch-backs, the steering geometry has been improved with a decreased turning radius.

The list of improvements goes on and on, but seeing is believing!
